Jingyi Testing (Guangdong) Co., Ltd.  
Testing Report

Report No.GDJY-HZ-202402929

4 Test Result

Table 2 Results of repeated determination of absorbance for 6 times

Determinati on times	1	2	3	4	5	6	Average absorbance
Blank absorbance A1	0.093	0.092	0.092	0.092	0.092	0.092	0.092
Sample absorbance A2	0.024	0.024	0.024	0.024	0.024	0.024	0.024
Positive control absorbance A3	0.085	0.084	0.084	0.084	0.084	0.084	0.084

Formula for calculating the inhibition rate of hyaluronidase activity:  
Inhibition rate of hyaluronidase activity (%) = [1 - (A2/A1)] \* 100%

Where: A1 refers to the average absorbance of the blank test.

A2 refers to the average absorbance of the diluted sample solution.

Table 3 Test results of inhibition rate of hyaluronidase activity

Name of Sample	Unit	Testing Results	Positive control
MLISS Hyaluronic Acid Moisturizing essence	%	73.91	8.70

Remarks: The positive control is 2mg/mL isotiquigenin solution.

5 Test conclusion

When the test sample was diluted into 5% aqueous solution, the inhibition rate of hyaluronidase activity was 73.91%, and that of the positive control was 8.70%. The inhibition rate of hyaluronidase activity of the sample was higher than that of the positive control sample, which showed that the test sample had certain soothing effect.
