

## MimioFrame B78X / B87W

**Under 5 minutes, your conventional whiteboard, projector and computer can be turned into an interactive touch board with the help of MimioFrame touch board kits.**

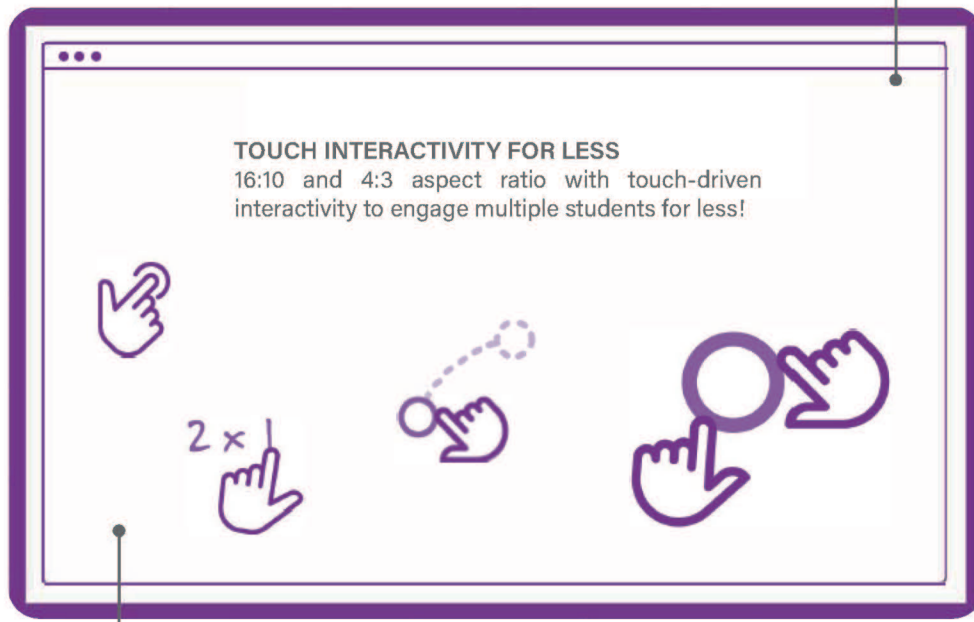

Create a touch board with the help of MimioFrame. This allows teachers and students to work together with an interactivity of 360° Touch. Students can write and manipulate objects - above, below or parallel and yet get a smooth and consistent response, making collaborative learning at the front of the classroom a reality.

- Engage multiple users in collaborative lessons or activities with 10 single-touch points or 5 dual-touch points.
- The frame is installed directly onto your dry erasable board using included industrial double-sided tape - no drilling, no mess, and not losing any whiteboard writing space.
- Includes the dynamic MimioStudio™ classroom software and the MimioMobile™ app, which together enable collaboration and assessment at the front of the room or on almost any devices. Comes with three free MimioMobile™ connections.
- The lightweight kit is designed for easy installation and 75% less shipping costs than standard touch board.

#### LEVERAGE YOUR CURRENT RESOURCES

Use your existing projector, classroom computer, and whiteboard with the MimioFrame to create a collaborative area.

#### MULTIPLE STUDENTS COLLABORATION

With 10 touch points, you'll enjoy true collaborative learning with 4, 6, or even 10 students working together.

## Features

- This lightweight frame is easily attached to your current whiteboard by using the included industrial double-sided tape.
- Delivered in a small box weighing less than 9 lb.
- Includes MimioStudio™ lesson creation, collaboration, and assessment software.

**MimioStudio software - easy to be used and engaging, your teachers are bound to use it every day.**

The MimioFrame touch board kit includes the dynamic MimioStudio™ classroom software. It connects the Boxlight products, so by using other tools - from the document camera to the pen tablet - is quick and easy. MimioStudio™ software allows educators to create interactive lessons and collaborative activities, as well as perform real-time formative assessment. The software also opens other IWB activities, enabling educators to use the interactive content they already have. Take learning even further with our MimioMobile™ app, which brings group learning and collaboration to almost any devices.
