IMPORTANT! KEEP THIS GUIDE FOR FUTURE REFERENCE.

For your safety, READ ALL INSTRUCTIONS AND CAUTIONS THOROUGHLY BEFORE USING THE BABY WRAP. Pass this user manual with the carrier to future users of this carrier.

WARNING

Failure to follow manufacture's instructions can result in death or serious injury.

- Recommended Age
 - Face-To-Face carrying for newborn babies : For a baby from 10 days old until they can support their head by themselves. (around 6kg / 13lbs)
 - Face-To-Face carrying for older babies : For a baby who can support their head by themselves until 2 years old (6kg / 13lbs to around 13kg / 29lbs).
 - Wasit carrying : For a baby who can support their head by themselves until 3 years old (6kg / 13lbs to around 15kg / 33lbs).
- Prior to use, examine for any damage, breaking or fraying. If damaged, do not use this product.
- Do not unstitch the edge of the tape or sewing.
- Do not unbuckle the belt while your baby is still in the carrier. Ensure the buckle is fastened well.
- Do not untie this product while your baby is in the carrier. Make sure the carrier is securely tied.
- Be sure to take your baby out of the carrier before you untie the carrier or unbuckle the waist belt.
- Adjust the waist belt to fit your body.
- Be careful not to catch your baby's fingers in the buckle. When not in use, preset the buckle.
- Your baby must be supported with your hand. Pay attention to your baby's responsiveness while in the carrier.
- User must be sure that baby's airway is always clear and that baby is breathing normally at all times.
- Do not use this carrier for other purpose.
- Do not use this carrier for a child with disabilities.
- Your balance may be adversely affected by your movement and that of your child.
- Take care when bending or leaning forward.
- This carrier is not suitable for use during sports activities.
- Do not use this product if your baby's movement could negatively affect your balance.
- Refrain from use on aeroplanes, cars, motorbikes and bicycles.
- SUFFOCATION HAZARD
 - Ensure your baby's face is not pressed against the fabric of the carrier or your body. (Ensure the infants face is above the fabric, visible, and free from obstructions at all times.)
 - Ensure the baby does not curl into a "C" position with the chin resting on or near the chest. This position can interfere with breathing, even if nothing is covering his/her nose or mouth.
 - Do not use this carrier if you have any physical or health problems including but not limited to muscular, circulatory, or skeletal issues, balance issues or history of dizziness, or history of back pain, or leg pain.
 - Take medical advice if your child is premature, has a low birth weight, breathing difficulties or is in any way unwell before using the carrier. (Babies at great risk of suffocation include those born prematurely, this with respiratory problems and those under six months of age.)
 - Ensure your child's chin is not positioned onto it's chest as it's breathing may be restricted at all times.
 - Ensure that your child is securely positioned in the carrier.

Caution

Incorrect handling and use of this product may cause material damage or serious injuries.

- We do not recommend to use any baby carrier for 30 minutes after feeding. (Doing so may put pressure on your baby's stomach.)
- Be aware that continuous use for a long time may harm your health.
- The user's visibility and balance may become adversely affected. Use the carrier with caution.
- If this product is wet, the friction may cause dye transfer.
- Follow appropriate disposal guidelines for disposal of this product.
- Do not place more than one child in the carrier.
- Do not use more than one carrier at the same time.
- Do not use this carrier during cooking.
- Avoid use near fire, stoves or other heating devices.
- Please note the increased risk of your child falling out of the carrier since he/she becomes more active as they grow.
- Store this product in shade place to avoid degradation or change of color.

Correct

Face-to-face,
Upright (optimal)
Chin up, Face visible
Nose and mouth free.

Correct

Hip-carrying.
Upright (optimal)
Chin up, Face visible
Nose and mouth free.

Incorrect

Face out.
Baby's legs are pressured
because the width of
thigh is too wide.

Incorrect

Baby's legs are pressured
and might cause hip dysplasia.
Baby is hunched with chin
touching chest, face covered.

PITTARi Wrap - An advanced version of a baby wrap.

What is a regular "Baby Wrap"?

A baby wrap is a standard baby carrier used in Western cultures. It is very simple to use, attach baby to your body by wrapping long fabric around yourselves. (5m length and 50cm width). Both wearer and baby will feel comfortable and secure. Your baby will easily fall asleep. There are many difficulties to use wraps.

What is a "PITTARi Wrap"

A Japanese father of twins loved the concept of regular wraps. He was impressed by how snug and secure it is. The wrap was superior in comfort and his baby's were content. However, nobody uses baby wraps in Japan.

Why are baby wraps not popular in Japan...

He soon realised why regular wraps were not popular.

- Easy to get dirty as the fabric tail touches the ground.
- Difficult to use and takes time to put it on.
- Not convenient to take around as it's bulky.

His thoughts matched wrap reviews online. He then started to develop a better baby wrap. Keep the great points of the baby wrap, but improve the bad points. He wanted to share the product with the world. With this, "PITTARi Wrap is born".

Advanced

"PITTARi Wrap" is an advanced baby wrap carrier, combined with waist belt and storage pouch.

"Waist Belt" + "Storage pouch" + "Baby Wrap" = "PITTARi Wrap"

Advanced point

- Clean: The fabric tail won't touch the ground as it is tucked into its own storage pouch.
- ECO: Because of the waist belt, the fabric quantity is less than other baby wrap.
- Compact: Store the fabric into the pouch on the waist belt.
- Easy wearing: As the fabric is much shorter, it is easier to use.

We hope you will enjoy the convenience of PITTARi and enjoy bonding with your baby!

Preparation for "Face-To-Face carrying"

1

Fasten waist belt to your body.
There is an elastic band at the end of the belt to store excess belt.

2

Take out 2 pieces of fabric from the pocket on the waist belt and sling over your shoulders.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

3

Cross the fabric over to make "an X mark" on your back. Bring the fabric tails to the front.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

4

Cross the fabric over at your front and bring the tails around your back at waist height and firmly tie.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

5

Ready to use PITTARi Wrap.
This is what your PITTARi Wrap should look like.
Point: If the fabric around your body is sagging or too tight, repeat steps 1-4 again.

Point to check!

In case you find the fabric is short and can not tie the knot on your back, go back to procedure 4, tie the fabric at your side.

Point to check!

Ensure you have tied the wrap firmly and that the knot won't undo.

Face-To-Face for newborn baby

Pictures

- Fabric closest to your body
- Second layer of fabric
- Top layer of fabric

The red marked fabric and blue marked fabric may be switched depending on the order you placed the sling over your shoulder. There may be 1 or 2 layers of green marked fabric depending on the wearers size. (For more details, refer to "Preparation for Face-To-Face carrying" / page 3.)

1

Stretch out the red marked fabric to put your baby in.

2

Put your baby between the red marked fabric and your body. After putting your baby in, let the fabric stretch to cover your baby's hip, back and shoulder well.

Check Point

When you put your baby in, be sure your baby's legs are placed in a M-Shape (see 1). Do not let your baby's legs straighten like picture 2. if you do so, your baby might face the risk of dislocation of the hip.

(from 10 days old until around 6kg / 13lbs)

3

Let the blue marked fabric stretch to cover your baby's hip, back and shoulders well.

4

Pull the green marked fabric up to cover your baby's hip and back. In case there are 2 green marked fabrics, pull both pieces of fabric up to cover your baby well.

5

Ready to use!

Ensure your baby's airway is clear at all times. When your baby can not support his/her head by him/herself, support his/her head with red marked fabric.

You should be able to kiss your baby's head.
If you find your baby is sagging, please wear this product more tightly. As the fabric is stretchy, tightening the wrap firmly is required.

How to take your baby out

Do not unbuckle the waist belt or unravel the fabric before you take out your baby. First, take your baby out then unbuckle or unravel this product. Otherwise, your baby might fall.

Face-To-Face carrying for older baby

Pictures

- Fabric closest to your body
- Second layer of fabric
- Top layer of fabric

The red marked fabric and blue marked fabric may be switched depending on the order you placed the sling over your shoulder. There may be 1 or 2 layers of green marked fabric depending on the wearers size. (For more details, refer to "Preparation for Face-To-Face carrying" / page 3.)

1

Stretch out the red marked fabric to put your baby in.

2

Put your baby between the red marked fabric and your body. Your baby's leg should pass through the fabric opening. Position the fabric to cover your baby's hip, back and shoulder well.

3

Let the blue marked fabric stretch to cover your baby's hip, back and shoulders well. Your baby's leg should pass through the fabric opening.

Point : Ensure your baby's legs are placed in a M-shape and the fabric passes your baby's legs up to their knee.

**From 4 months old until 2 years old
(6kg / 13lbs to 13kg / 29lbs).**

4

Pull the green marked fabric up allowing your baby's leg to pass through. Do same procedure to your baby's opposite leg. If the green marked fabric is 2 layers, please pass legs through both layers.

5

Pull up green marked fabric to cover your baby's hip and back. In case there are 2 green marked fabrics, pull both pieces of fabric up to cover your baby well.

6

Ready to use Face-To-Face carrying.

If you find your baby is sagging, please wear this product more tightly. As the fabric is stretchy, tightening the wrap firmly is required.

How to take your baby out

Do not unbuckle the waist belt or unravel the fabric before you take out your baby. First, take your baby out then unbuckle or unravel this product. Otherwise, your baby might fall.

Preparation for "Hip Carrying"

1

Set your waist belt on either side of your body. There is an elastic band at the end of the belt strap to store any excess strap. This user manual shows how to carry your baby on the right side of your body.

2

Take out 2 pieces of fabric from the pocket on the waist belt and sling over your shoulders.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

3

Cross the fabric over to make "an X mark" on your back. Bring the fabric tails to the front.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

4

Cross the fabric over at the front and bring the tails around your side and tie firmly.

Point 1: Avoid twisting the fabric.
Point 2: Do not let the fabric sag.

From 4 months old until 3 years old
(6kg / 13lbs to 15kg / 33lbs).

5

Ready to use in the hip carrying.

Point: If the fabric around your body is sagging or too tight, repeat steps 1-4 again.

Check Point

If the fabric length is short for you, at step 3, make tie at side of your body (no need to cross the fabric over on your front.)

In case you set the waist belt on the left side of your body, the knot should be on the right side of your body.

Check Point

Tie the knot firmly.
Do not allow the knot to sag.

Hip Carrying

Pictures

- Fabric closest to your body
- Second layer of fabric
- Top layer of fabric

The red marked fabric and blue marked fabric may be switched depending on the order you placed the sling over your shoulder. There may be 1 or 2 layers of green marked fabric depending on the wearers size. (For more details, refer to "Preparation for Face-To-Face carrying" / page 3.)

1

Stretch out the red marked fabric, to put your baby in.

2

Put your baby between the red marked fabric and your body. Your baby's leg should pass through the fabric opening. Position the fabric to cover your baby's hip, back and shoulder well.

3

Let the blue marked fabric stretch to cover your baby's hip, back and shoulders well. Your baby's leg should pass through the fabric opening.

Point : Ensure your baby's legs are placed in a M-shape and the fabric passes your baby's legs up to their knee.

4

Pull the green marked fabric up allowing your baby's leg to pass through. Do same procedure to your baby's opposite leg. If the green marked fabric is 2 layers, please pass legs through both layers.

5

Pull up green marked fabric to cover your baby's hip and back.

6

Ready to use Hip carrying.

If you find your baby is sagging, please wear this product more tightly. As the fabric is stretchy, tightening the wrap firmly is required.

How to take baby out

Do not unbuckle the waist belt or unravel the fabric before you take out your baby. First, take your baby out then unbuckle or unravel this product. Otherwise, your baby might fall.

Points for correct position

Do not cover your baby's face.

If you cover your baby's face with this product, your baby may not be able to breath.

Ideal height position of baby

You should be able to kiss your baby's forehead.

How to store

Fold and roll the fabric to store into the pocket on the waist belt.

You might find PITTARi difficult to use at first.
But, a lot of mothers say after 2 or 3 times use, they get used to it.
We hope you find PITTARi Wrap comfortable and convenient!

Company introduction - Lucky Industry

The First step is a "hug".

A precious baby is born.
The natural action for a mother and father to do is
"hug".

A new born baby can not see the world yet.
So, a "hug" is the best way
to comfort a baby.

Baby becomes bigger,
but still wants his/her mother and father hug
as he/she understand "touching is the key to their comfort and happiness."

Past, present and future, it won't change.
"Love is a hug with parents and baby."
To ensure hugs are maintained for longer periods, baby carriers are required.
Lucky Industry will help
with providing you with the tools, the baby carriers.
