3M™ MCS™ Warranty Buildings, Walls, and Glass Graphics

Be big, bold, and unexpected. From exterior and interior walls to windows and glass, 3M™ Graphic Films are perfect for bringing your building to life.

Make your surfaces sing.

You've established your business. Now it's time to stretch your brand across building exteriors, windows and glass, and interior walls. Whatever the surface, 3M™ Graphic Films are a great way to turn these blank canvases into vibrant brand experiences.

Whether you're starting out in a brand-new space or simply need a quick refresh, our films are designed to support your brand and fit your business.

Our broad portfolio of films can cover any surface and any texture, from brick exteriors to smooth walls, and more – easily transforming your environment into the unique and personalized experience you and your customers deserve.

Unwavering confidence.

You built your business – and your branding – to endure. That’s why you invest in graphics that give you the confidence they’ll look good from the day you apply them to the very end of their life.

At 3M, we build our graphic products to last. Since 1902, we’ve been generating breakthrough solutions that deliver high performance and consistent quality. Today, at advanced testing facilities across the globe, we subject our films to rigorous testing for resistance to humidity, UV rays, and more – simulating years of exposure to harsh conditions.

As a Fortune 500 company, 3M continues to revolutionize the graphics industry with new technologies and products to showcase your brand. We’re so confident in our weather science that should your graphic fail on the last day of its warranty, our non-prorated 3M[™] MCS[™] Warranty covers it like it was Day 1.

Building exteriors.

Bring your building exterior to life, and watch your business grow. Don’t let brick and mortar get in the way of your killer graphics. At 3M, our films can tackle anything, from smooth outdoor walls to any seemingly difficult textured surface.

Our durable films feature the performance and image quality you need to keep your messaging looking great for years to come. Go ahead and transform your building into a larger-than-life branding experience.

Interior walls.

Turn your indoor surfaces into works of art. From printable films and finishes to colored films, and more – you’ll easily add style, sophistication, and atmosphere. The creative possibilities are endless.

Give your printed graphic the perfect finish and protection. From matte for reduced glare and reflections, to textures that enhance and add depth. Pair your film with a 3M overlaminate to guard against scuffs, and to ensure easy cleaning and UV protection.

Windows & glass surfaces.

Get your shine on. Windows and glass surfaces are amazing real-estate opportunities for creating a unique look and feel, or for applying short- and long-term branding.

From perforated to translucent, to textured and frosted finishes, and more – 3M offers unlimited design options from our comprehensive portfolio of window films.

Test your walls.

The 3M[™] Adhesion Test Kit for smooth walls is required to help graphics installers identify the best film to use on walls in about 20 minutes.

Industry-leading performance.

3M[™] Graphic Films mean business.

For big and bold messaging to the masses, 3M films offer more design options, fast installation, and easy removal. Our films wrap around and lay on any surface type with the quality finish you’ve come to expect from 3M.

Amazing printability.

From subtle effect to maximum wow factor, our wrap films are engineered for excellent print quality, no matter what custom design you have in mind. Vibrant and attention-grabbing, 3M films will bring your designs to life smoothly and seamlessly.

Highly conformable.

Designed to tackle the most demanding curves, contours, grooves, or corners, 3M films can wrap around and adhere to just about anything. Easy to handle and install, our films include excellent resistance to lifting, cracking, and peeling – which means no unnecessary repairs, rework, or downtime.

Easier removal.

Our removable and changeable films are guaranteed to lift with little or no adhesive residue – leaving you with minimal clean-up and the original surface intact. No more extra time or money spent on unnecessary repairs when it comes time to change or rebrand your space.

Extreme durability.

UV rays. High temperatures. Humidity. Even acid dew. Throw everything Mother Nature’s got at 3M wraps and they’ll hold up to the toughest environments. No browning. No staining. No matter the extremes you go to, they’ll meet, or more likely exceed, your performance expectations.
