HUMAN TOXICOLOGY OVERALL ASSESSMENT
„Kärcher Systempflege RM 110“
(recipe name: „Systempflege RM 110“)
on surfaces / objects which may come in contact with food
Test Report No.: 3576518-04

Product: **Kärcher Systempflege RM 110**
Formulation No.: RM 110/20.1

Taunusstein, July 08, 2016

Certificate

According to the above-mentioned legal requirements results in the human toxicology relevant evaluation of the properties of the raw materials used according to the recipe, and the consideration of potential human exposure based on the information for use, that the cleaning agent

„Kärcher Systempflege RM 110“

from human toxicology for use for application to surfaces / objects which may come into contact with food, must be regarded as safe.

The well from professional applications (rinse with water under pressure of drinking water quality) may still be remaining product residues are to be regarded from human toxicology as uncritical; an adverse change of food is not expected.

It can certify that the rated cleaners are basically suitable to be used in a food processing company as part of a HACCP concept.

Basis for this review are:

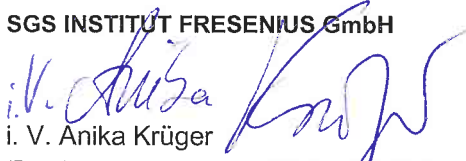

1. the safety toxicological reviews all raw materials with special emphasis on under chemicals laws classified as hazardous
2. the toxicological safety assessment of the finished product taking into account the qualitative and quantitative formulation compared to application-relevant considerations,
3. the toxicological safety assessment of the degree of exposure, taking into account the intended and foreseeable use and
4. other safety toxicological relevant elements such as the information for use by the manufacturer.

Validity

The present human toxicological evaluation (risk derivative) applies as long as no significant, the application safeties of the qualitative and/ or quantitative changes product in the recipe are made or new insights into the human toxicological properties of raw materials (ingredients) are known. A re-evaluation of the product is required, if significant, safety complaints should result from the use.

The safety review was carried out by our contracted partner Dr. Haselbach.
