**SECTION VI: ACCIDENTAL RELEASE MEASURE**

**Personal Precautions, Protective** Follow safe handling advice and personal protective equipment recommendations.

**Equipment and Emergency Procedures:**

**Environmental Precautions:** Discharge into the environment must be avoided.  
Prevent further leakage or spillage if safe to do so.  
Retain and dispose of contaminated wash water.  
Local authorities should be advised if significant spillages cannot be contained.

**Methods and Materials for Containment and Cleaning Up:**

Soak up with inert absorbent material.  
For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container.  
Clean up remaining materials from spill with suitable absorbent.  
Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable.  
Section XIII and XV of this SDS provide information regarding certain local or national requirements.

**SECTION VII: SAFE HANDLING AND STORAGE****Handling****Precautions for safe handling**

Technical measures: See engineering measures under EXPOSURE CONTROL/ PERSONAL PROTECTION section.

Local/Total ventilation: Use only with adequate ventilation.

Advice on safe handling: Handle in accordance with good industrial hygiene and safety practice. Take care to prevent spills, waste and minimize release to environment.

**Storage****Conditions for safe storage, including any incompatibilities**

Condition for safe storage: Keep in properly labeled containers.  
Store in accordance with the particular national regulations.

Materials to avoid: Do not store with the following product types.  
Strong oxidizing agents.

**SECTION VIII: EXPOSURE CONTROL AND PERSONAL PROTECTION****Control Parameters**

Components	CAS No.	Value type (Form of exposure)	Control parameters / permissible concentration	Basis
Distillates (petroleum), hydrotreated middle	64742-46-7	TWA (mist)	5 mg/m <sup>3</sup>	MY PEL
Silicone dioxide	7631-86-9	TWA	10 mg/m <sup>3</sup>	MY PEL

**These substance(s) are inextricably bound in the product and therefore do not contribute to a dust inhalation hazard.**

Silicone dioxide

**Appropriate engineering control :** Processing may form hazardous components (refer Section X)  
Ensure adequate ventilation, especially in confined area.  
Minimize workplace exposure concentrations.

**Individual Protection Measures, such as Personal Protective Equipment**

<b>Eye/Face Protection:</b>	Wear the following personal protective equipment: Safety glasses.
<b>Skin Protection:</b>	Select appropriate protective clothing based on chemical resistance data and an assessment of the local exposure potential. Skin contact must be avoided by using impervious protective clothing (gloves, aprons, boots, etc).
<b>Hand Protection Material:</b>	Chemical-resistant gloves.
<b>Remarks:</b>	Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. Breakthrough time is not determined for the product. Change gloves often. For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer. Wash hands before breaks and at the end of workday.
<b>Respiratory Protection:</b>	Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines.
<b>Filter Type:</b>	Combined particulates and organic vapour type.
<b>Hygiene Measures:</b>	Ensure that eye flushing systems and safety showers are located close to the working place. When using do not eat, drink or smoke Wash contaminated clothing before re-use. These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions.
