Water could not reach the base

Cause: Water tank lid is dirty or placement is incorrect or too much water in the tank.

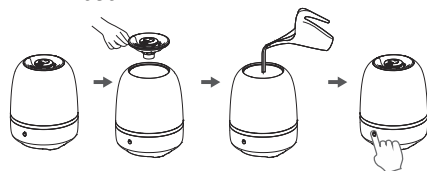

Solution: Clean the tank lid or place the tank properly or remove some water out of the tank.

Product Instructions

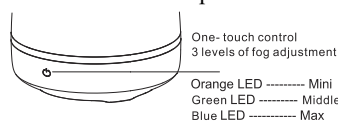

Deroma M430

Deroma M535

1. Place the machine on a flat surface. Remove the water tank cover from the water tank and fill clean water into the water tank. (NOTE: Please do not exceed the MAX. level to prevent water leakage from top and affect mist volume.)
2. Place back the water tank cover back to the water tank and connect the power to the wall plug.

3. Turn on the power by switching the mist knob (for M430) or touching the power button once (for M535). The indicator light will turn blue and the machine will start to operate.
4. When the water level is low, the indicator light will turn red (M430) / orange (M535), and after flash for 10 seconds, it will automatically shut off until the tank is refilled with water.
5. To turn off the light, long press the button for 5 seconds (M535).

UV Sterilization

This humidifier utilizes a UV light technology to sanitize water before it is transformed into soothing cool mist. This process eliminates 99.999% of germs, bacteria, viruses and mold lurking in the water. The UV light will automatically activate when the machine is turned on.

Cleaning and Maintenance

Water Tank and Motor Base

1. Use a clean cloth to wipe the water tank and motor base. Do not use hard objects when cleaning to avoid damage to the parts.
2. Always replace the old water in the water tank to keep the humidifier clean.
3. Keep the humidifier dry when not in use for long period of time.

Motor Base and Mist Atomizer

Add detergent powder (for humidifier) with clean water and soak as per detergent instructions. Wipe and rinse with clean water and leave it dry.

NOTE:

* Remember to unplug the power plug before any cleaning or maintenance.

* Do clean the dirt and stain at the water tank and motor base of humidifier regularly, recommend once a week or every 2 days if using essential oil or sanitizer.

*Never use other chemical acids, enzymes or detergents, as it may risk poisonous gas to be created or cause malfunction.

Reminder

The humidifier uses ultrasonic misting disc vibration to disperse liquid water into water mist. The water tank is only transitional water storage, there will be water accumulating at the base area.

If there is water around the machine during use, it means that the room is too humid, please adjust the mist volume accordingly.

Precautions

1. The power supply voltage must be consistent with the rated power of this product.
2. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
