against free radicals.*

Rose D-Tox

BI-PHASE DETOXIFYING ENERGIZER
with Botanical Cells

*The CASMARA Laboratory has created **3 super-concentrated** and light, quick-absorb formulas, with a sublime combination of wonderful active ingredients.*

Pure avant-garde cosmetics that envelops you with its delicious **textures**, delicate **aromas** and incredible **results**.

Rose

DID YOU PREVIOUSLY

On a daily basis, toxins accumulate inside and outside the cells, preventing them from performing their vital functions properly.

The accumulation of these substances has consequences, meaning the cell has a shorter life span. In other words, its metabolic processes are defective, and it has low energy levels. This internal process becomes visible on the outside, accelerating the appearance of wrinkles, spots, etc.

Rose D-Tox made of **BOTANICAL CELLS** from the **white rose**, **blue daisy** and **pure molecules** from **wakame**, acts on the inside and outside of the cell, detoxifying it deeply. Its prodigious formula increases energy levels and prevents cellular oxidative stress, prolonging their life span. An innovative combination of key anti-aging ingredients that counteracts the signs of aging.

RESULTS

- ✓ Toxins
detoxified
- ✓ Skin
rejuvenated
- ✓ Anti-oxidant
boosted

WITH **ROSE D-TOX** CELLS ARE DETOXED, REACTIVATED AND FULL OF ENERGY. THE RESULT IS A RESPLENDENT, GLOWING FACE.

MAIN

- **BLUE MARGARITA: cellular detoxifier.** It eliminates waste and toxins from inside the cell, thanks to its powerful enhancer of the natural skin detoxification process. In addition, it provides intensive skin protection against oxidative stress.
- **WHITE ROSE: energizer.** It increases the mitochondrial energy level thanks to the stimulation of cellular respiration. This causes an increase in the amount of energy available to the cell to perform its metabolic processes.
- **PURE MOLECULES OF WAKAME: promotes cellular longevity.** It protects mitochondrial DNA, thanks to which it reduces the formation of free radicals. In the long term, there is a remarkable increase in the skin's antioxidant capacity thanks to its fucoxanthin content that counteracts oxidative stress **preventing the overall appearance of aging.**
- **LIPOIC ACID: anti-aging.** Revolutionary double-action ingredient: it counterbalances the damaging action of free radicals and reactivates inactive antioxidants, preventing the aging of the skin and prolonging cellular life.
- **GSH-BOOSTER: antioxidant.** It enhances the synthesis of the only naturally-present antioxidant in our body (GSH). In addition, it can reactivate anti-aging vitamins C and E, essential elements in fighting cell deterioration. The consequence being that the skin is fortified against signs of aging.

WHO

Essential care for all skin types. Especially recommended for dull, drab, stressed skin.

Silicon-free and mineral oils-free formula.
