## *Intensive lipo-reducing firming cream*

Reduces localized fat, visibly removes and prevents cellulite and firms the skin.

**Body Sculptor** is a cosmetic innovation in body care. With a light and delicate texture, it features a balanced amount of powerful firming and fat-burning active ingredients, perfectly combined to help achieve the ideal figure. Thanks to its rapid absorption after application, the skin is left feeling pleasantly moisturized.

### ACTIVE INGREDIENTS:

- **PHYCO R75®: fat burning.** This active ingredient is extracted from the *Laminaria digitata* algae. It stimulates the breakdown of fat inside the adipocytes and its removal from the cells.
- **ZEDOMINE: draining.** Composed of a blend of 3 essential oils (turmeric, ginger and cinnamon), it activates microcirculation and increases lymphatic drainage.
- **DERMOCHLORELLA®: firming.** Extracted from a unicellular algae (*Chlorella vulgaris*), its spectacular cell division capacity promotes the overall restructuring of the skin fiber network. It has a direct firming effect while ensuring correct cohesion between the dermis and epidermis. Also stimulates skin regeneration and improves elasticity.
- **BIOSCULPTINE®: preventive and targeted liporeducer.** This combination of two polyphenol-rich plants has a double action: stimulating lipolysis (breaking down fat in the adipocytes) and inhibiting the formation of new fat cells.

### *Who is it suitable for?*

Unisex formula. Indicated for people who want to slim and improve their silhouette. This is also the ideal treatment for maintaining the figure. Recommended to treat both large and more localized areas.

### APPLICATION MODE

Apply **Body Sculptor** cream over the area to be treated (arms, abdomen, legs and buttocks). We recommend applying it daily, preferably twice a day, massaging energetically with circular movements until fully absorbed.

To enhance its **perfecting and remodeling action**, we recommend applying it in combination with **Sublime Effect Body Oil**.
