Discover **U5**: the next generation of Uukha limbs

At Uukha, we're always pushing limits to bring all archers the very best in technology, performance and enjoyment.

Back in 2021, we introduced our 4th generation of limbs, the S-Curve range, featuring an innovative profile and a brand-new ILF base.

Today, we're proud to unveil U5, the 5th generation of Uukha limbs.

Whether you're into target shooting, hunting, recreational archery or competing at the highest level, this new range is designed to meet all your needs.

With unmatched performance and unforgettable sensations, the U5 range goes beyond anything you've ever imagined.

Ready to take your experience to the next level?

Feel the flow

When every shot becomes a unique experience

**Close your eyes. Imagine. Feel it...
Think about the joy that every shot brings.**

Picture the incredible satisfaction of a perfect release, adrenaline as your arrow slices through the air and hits the target with almost unreal, even supernatural precision. What a feeling...

U5 range is more than just a list of new technological and mechanical innovations. It's more than just shooting an arrow. It's a perfect harmony between you, your bow, and your target.

Your senses awaken for those unique, almost suspended moments. As Guillaume Toucoulet shared during his first trials of our target limbs: ***"U5 limbs are so easy to shoot with. I can really feel the power and energy stored and then released. The sound is crisp and sharp. They're incredible. »***

And for instinctive shooting enthusiasts, you're not left out, as our U5 range offers the perfect blend of instinct and mastery.

With our new nature-inspired limbs, experience the simple joy of pure archery - the release of an arrow into the serene silence of natural world. **Each shot resonates as a unique moment of connection with the environment around you.**

#Feeltheflow

Why choose our U5 limbs?

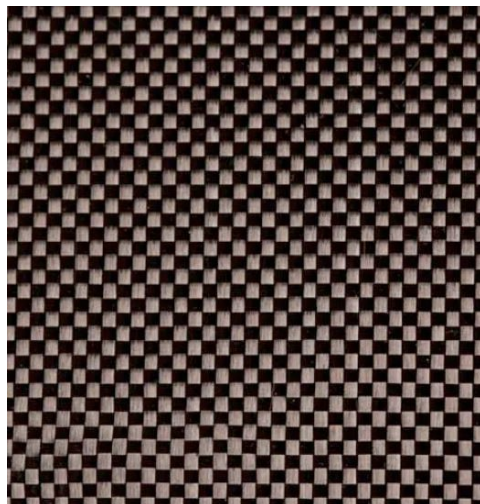

Shoot with total confidence

Experience enhanced stability at full draw, improved aim and greater torsional rigidity - all made possible by the innovations of U5 range.

U5 limbs feature the finest carbon fabrics: lighter and stronger than ever.

The layering process has been re-engineered to achieve an unprecedented level of overall stability.

Shoot with confidence and feel the difference in every release - your arrows will group tighter and land closer to center.

#Feeltheflow

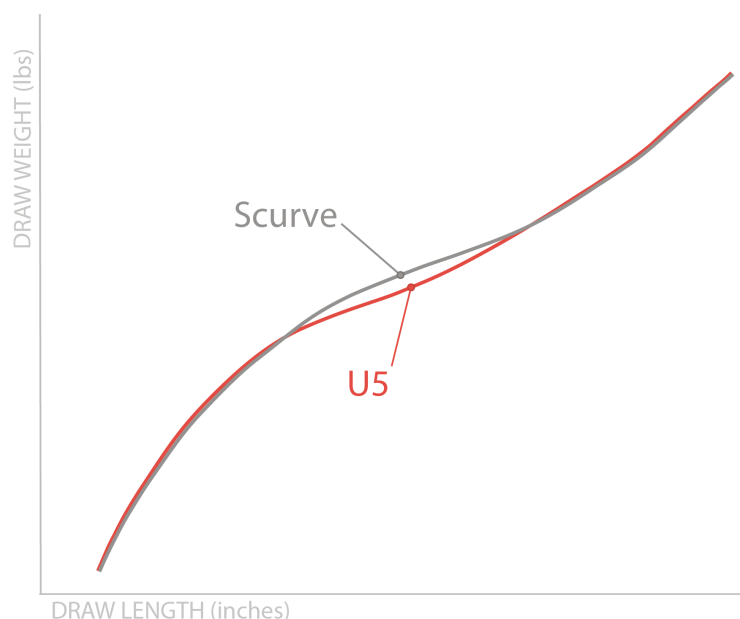

For unique sensations and enjoyment with every shot

Thanks to the new limb profile, combined with a finish that remains exceptionally smooth, we offer you a **linear draw experience**.

Patented Monolith Carbon technology ensures reduced vibrations for greater comfort.

As we've tested, you'll discover a linear draw effort, unmatched comfort at full draw and a smooth release.

Whether you're a high-level athlete or a recreational archer, extend the joy of shooting without unnecessary fatigue.

#Feeltheflow

For performance at your fingertips

U5 range brings unmatched speed and precision.

Thanks to optimized materials, limbs are lighter, delivering unparalleled speed in the market.

Each shot is flatter and more accurate, even in strong winds.

More speed, less effort: for the same arrow speed, you'd need up to 4# more draw weight with other limbs on the market.

Finally, Uukha offers consistent quality, shot after shot, in all weather conditions. That's the Uukha commitment and the quality of **"Made in France."**

U5 limbs truly outperform every other limb we've tested so far.

Now it's your turn : experience the U5 difference for yourself !

#Feeltheflow

U5 Limbs range

The U5 range consists of six limbs models:
three target limbs and three nature limbs.

Target limbs :

Designed for precision and performance in competitive shooting.

- **Omega**

- **Sigma**

- **Alpha**

Nature limbs

Primarily designed for hunting, these limbs share the same profile and construction as the target limbs.

Weighed on a 19" riser, they are available in 5# increments.

- **Altan**

- **Mazaalai**

- **Yangi**

U5 target limbs

OMEGA: High performance without compromise

Made from 100% carbon fiber, OMEGA limbs feature the finest, lightest, and strongest high-quality carbon fabrics. They maintain the same stability as the Sx+ model but deliver an even higher level of speed.

Offering an extraordinary level of precision - far beyond other premium limbs on the market and anything we've ever shot before - **OMEGA limbs are the ideal choice for archers seeking top-tier performance.**

With OMEGA limbs, there's no compromise: enjoy linear draw effort, unmatched comfort at full draw, perfect stability, impressive arrow speed, exceptional precision and above all, unparalleled shooting pleasure.

#Feeltheflow

SIGMA, push all limits further

With a composition of 90% carbon fiber and 10% fiberglass, SIGMA limbs stand out as a challenger offering technical and mechanical performance far superior to other premium limbs on the market.

They also differentiate themselves with a **more competitive price point compared to other brands.**

Faster while maintaining a high level of stability, **SIGMA limbs are the ideal choice for archers striving for the best results.**

#Feeltheflow

ALPHA: Discover the Next Level

Made with **70% carbon fiber and 30% fiberglass**, our entry-level limbs feature 20% more carbon than Sx50 model.

Just like Sx50 was previously, new **ALPHA limbs** now offer **the best value for money on the market.**

With their composition, technical and mechanical qualities, **they are the ideal limbs for passionate archers looking to explore a significantly higher level of performance while staying within budget.**

#Feeltheflow

U5 nature limbs

Designed for Hunting, these limbs share the same profile and construction as target limbs.

Unlike laminated limbs, Monolith Carbon technology ensures consistent performance regardless of weather conditions.

Weighed on a 19" riser, they are available in 5# increments.

ALTAN, extreme speed and maximum precision

Made of 100% carbon fiber, ALTAN limbs (name of golden eagle in Mongolia) deliver unmatched speed in traditional hunting.

Their flat trajectory effectively compensates for distance estimation errors, **making them a must-have for archers seeking high precision.**

With ALTAN, there's no compromise. These limbs are now positioned as **the best hunting limbs we've ever shot.**

Precision, grouping, comfort, reliability, durability, and powerful penetration, **ALTAN limbs combine everything you could hope for in your hunting adventures.**

#Feeltheflow

MAZAALAÏ, speed and performance

Made of 90% carbon fiber and 10% fiberglass, Mazaalaiï limbs (*name of Gobi's bear*) are the perfect fusion of mastery, comfort and precision.

Their speed delivers incredible accuracy, helping to compensate for distance estimation errors while maintaining optimal penetration.

Precision, comfort, reliability - why not take your hunting to the next level with Mazaalaiï limbs ?

#Feeltheflow

YANGI, master your instinct

With the same construction as ALPHA target limbs, **YANGI limbs are made of 70% carbon fiber and 30% fiberglass.**

Faster than best-seller from our previous range, GOBI limbs, you'll be amazed by the comfort and high speed of these new limbs.

By far the best value for money, YANGI limbs stand out as an entry-level option that's far superior to other limbs on market.

#Feeltheflow

With this 5th generation of limbs, **Uukha marks a new technological leap never before seen in the world of archery.**

Once again, Uukha prioritizes innovation and performance **without ever sacrificing sensations, emotions and joy of shooting.**

Archers of all backgrounds, discover in this new U5 range the only pair of limbs that will elevate every arrow you release.

Let yourself be carried away by pure pleasure and performance.
